

2024 Energy Adjustment Rider rates

The Minnesota Public Utilities Commission approved monthly rates for our Energy Adjustment Rider. A rider is a charge for a specific feature, such as the cost of fuel. This rider pays for the cost of fuel we use to generate electricity to serve our customers, transportation costs for that fuel, and costs we incur to buy energy to supplement our own power plants. We established this rider in 1977 and currently apply it to customer bills monthly per kilowatt hour of energy used.

We've included updated 2024 monthly rates on this insert that includes the approved 2022 and 2023 true-up amounts not in the previous customer notice. Each customer class receives a separate Energy Adjustment Factor Rate to better reflect their cost of energy use¹.

¹We calculated these rates by multiplying the approved Energy Adjustment Rider Rate by the Class Energy Adjustment Factor Ratio.
