N

MANDATORY AND VOLUNTARY RIDERS: The amount of a bill for service will be modified by any Mandatory Rate Riders that must apply or Voluntary Rate Riders selected by the Customer. See sections 12 through 14 of the electric rates for the applicability matrices of riders.

DEFINITIONS OF SEASONS:

Summer: June through September.

Winter: October through May.

METERED AND ESTABLISHED DEMAND: The Metered Demand shall be the maximum kW registered over any period of one hour during the month for which the bill is rendered. The Established Demand shall be the Metered Demand adjusted for excess reactive demand.

ADJUSTMENT FOR EXCESS REACTIVE DEMAND: The Metered Demand shall be increased by 1 kW for each whole 10 kVar of reactive demand in excess of 50% of the measured demand in kW.

SPECIAL BILLING DEMAND: By customer request, Otter Tail Power may calculate the demand used for billing as the average of the previous twelve on-peak and off-peak Established Demands. The use of the special billing demand shall not exceed a period of six consecutive months. Otter Tail Power may agree to the use of the special billing demand upon conditions where customers have incurred, or can take advantage of, increased demand levels and the increased demand levels did not, or will not, increase Otter Tail Power’s peak load. During the period under which the customer’s billing demand is calculated in accordance to the provision of the Special Billing Demand, Otter Tail Power reserves the right to curtail the customer’s additional demand (i.e., any demand over the special billing demand level) back to the customer’s special billing demand in order to maintain the integrity of Otter Tail Power’s generation and transmission systems.
