(Effective July 1, 2009)

Change in South Dakota electric rates

On June 23, 2009, the PUC approved a revenue increase for Otter Tail Power Company of approximately \$2.9 million, or about 11.7 percent. The amount approved is less than Otter Tail Power Company's request of \$3.9 million, or about 15.3 percent. The PUC-approved increase was the first South Dakota rate increase approved for Otter Tail Power Company in more than 21 years.

One of the primary drivers of this increase, in addition to rising costs and growing energy use, is the cost associated with the significant amount of wind generation Otter Tail Power Company has recently constructed. While this additional wind generation requires an increase to base electric rates, it will reduce Otter Tail Power Company's energy purchases, and therefore customer bills will reflect an offsetting reduction in the Energy Adjustment.

Residential Demand Control electric rate structures

	Previous*	New
Residential Demand Control		
Monthly customer charge	\$ 10.55	\$12.00
Monthly minimum bill	Customer charge	Customer charge + demand charge

¹Summer season is June through September and winter season is October through May.

²Previous rate assumes an average cost of energy of 1.298 cents per kwh. We've assumed a kw demand of 5 for this comparison.

The PUC approved an overall increase of 17.06 percent for the Residential Demand Control rate. However, the impact to your electric service statement will vary depending on the electric rate(s) on which you are served and the amount of electricity you use. Your statement also will vary with changes associated with the costs for purchased power and the fuel Otter Tail Power Company uses to serve you. Please remember that we pass along purchased-energy and fuel costs without markup.
