***for you***

# Thermal storage

Imagine being enveloped in cozy warmth, even in the coldest conditions, **and** saving on your heating costs at the same time. That's the warmth thermal-storage systems provide.

By storing heat during off-peak hours, you qualify for discounted off-peak rates that can save you hundreds of dollars a year.

## Choose from several electric options:

- Underfloor heat storage
- Central heat-storage furnace
- Individually controlled room units

Building or remodeling next year? Now is the time to consider thermal-storage systems.

**Generous rebates** are available on qualified thermal-storage systems.
