

Customer notice

The Minnesota Public Utilities Commission approved Otter Tail Power Company's request to include the Energy-Intensive, Trade-Exposed (EITE) Rider as part of the Resource Adjustment on your monthly electric bill. This rider recovers costs associated with the energy policy of the state of Minnesota to ensure competitive electric rates for EITE customers. The table below shows the new rate, effective June 1, 2018, for all customer classes subject to the charge. A residential customer who is subject to the charge and uses 1,000 kWh per month will see a bill increase of about \$0.55. The charge does not apply to electric bills of EITE customers and residential customers participating in a low-income home energy assistance program through an approved organization.

June 1, 2018	
Class	Rate per kWh
All Service	\$0.00055
