

Planning to build a new facility?

**Save now—and later—
with high-efficiency lighting**

Get a rebate of up to \$600 per kilowatt when you add high-efficiency lighting to your new building construction project. Adding energy-efficient lighting will save you money long term, too.

EFFICIENT TECHNOLOGY	REBATE PER kW INSTALLED
LED (hard-wired interior)	\$600
LED (hard-wired exterior)	\$225
LED (screw-in interior)	\$225
LED (screw-in exterior)	\$100
Hi-bay fluorescent	\$225
Ceramic metal halide	\$225
Pin-based CFL	\$100
Low-wattage T8 lamps (28 watts or less)	\$50
Occupancy/daylight sensors	\$200/connected kW

Why wait to start? Instead of a rebate, our financing program lets you make energy-efficient updates to your business with a low interest rate. Visit otpc.com/financing for more details.
