Electric water heaters are safe and efficient

Electric is best

Meet your hot water needs, waste almost no energy, and get up to \$400 in rebates when you install a high-efficiency electric water heater on an off-peak service.

Electric water heaters are safe, efficient, and affordable.

Safety	Efficiency	Save with off-peak rates
 <p>No need to worry about combustion, pilot lights, gas leaks, fuel lines, or flue gases such as carbon monoxide because electric water heaters don't burn fossil fuel.</p>	 <p>Standard electric water heaters are up to 96 percent efficient, so nearly all energy goes directly to heating your water.</p>	 <p>Add an electric water heater to one of our off-peak rates, which are 25 to 50 percent less than our standard prices. Or, receive a monthly bill credit that's available with a simplified installation. You'll save!</p>

Electric water heater rebates vary by unit size with higher rebates available for new controlled service installations.

- Receive **\$200 to \$400** on grid-enabled 80-gallon or larger units.
- Receive **\$150 to \$300** on qualifying standard 80-gallon units.
- Receive **\$150** on a 50-gallon to 79-gallon electric unit on new controlled service installations.
