

Install a smart thermostat
and take advantage of generous rebates!

Smart thermostats provide comfort and flexibility for making savings easy.

Designed to learn your heating and cooling preferences, installing a smart thermostat is an easy way to save energy. If you have a less predictable schedule, make sure to look for smart thermostats with geofencing or motion/occupancy sensor capabilities. Geofencing works by using your smartphone's location to determine if you're home or away to ensure optimized savings and a comfortable home. And the motion/occupancy sensors work in a similar way to make savings as easy as walking out the door.

Electric heating customers

Receive \$100-\$150 for a Tier II or Tier III smart thermostat purchase.

Cooling only customers

Receive \$35-\$50 for a Tier II or Tier III smart thermostat purchase.
