

Customer notice

On October 31, 2019, the Minnesota Public Utilities Commission approved our forecasted monthly rates for your Energy Adjustment Rider. This rider includes the cost of fuel we use to generate electricity to serve our retail customers, transportation costs for that fuel, and costs we incur to buy energy to supplement our own power plants, minus a base cost for energy that already is part of the per-kilowatt-hour rate you pay.

We've included the 2020 monthly rates on the back. Each customer class receives a separate Energy Adjustment Factor Rate. We calculated the rates by multiplying the approved Energy Adjustment Rider Rate (on the back) by the Class Energy Adjustment Factor Ratio. For more information on this rate, see page 2 of your Electric Rate Schedule at otpc.com.
