

**Do you have an
emergency kit
packed in case
of a storm?**

Update your winter safety kit

Winter can mean bitter storms. Make sure you've checked your winter safety kit and updated it to include:

- A flashlight and extra batteries.
- Drinking water and food that won't spoil.
- A first aid kit and medicines.
- A battery-powered radio to receive emergency information.

During a winter storm, stay inside. Keep your body replenished with fluids to prevent dehydration, and wear layers of loose-fitting, warm clothing. Staying safe starts with a plan. Take time today to make sure you're prepared for severe weather.
