

Notice of increase to your Renewable Resource Cost Recovery Factor

On March 18, 2020, the North Dakota Public Service Commission approved recovery of our Merricourt Wind Energy Center and our request to increase our Renewable Resource Cost Recovery Rider Factor for usage on and after April 1, 2020. The approved factor for all classes of service now is 5.637 percent of base charges and credits. The previous factor was -0.224 percent, a credit. A typical residential customer's bill will increase by approximately \$4.01. The energy produced at the Merricourt Wind Energy Center will lower the costs customers pay through the Energy Adjustment Rider.

The Renewable Resource Cost Recovery Factor recovers costs associated with our investments in renewable generation resources.
