

2021 Energy Adjustment Rider Rates

On November 19, 2020, the Minnesota Public Utilities Commission approved our forecasted monthly rates for your Energy Adjustment Rider. This rider includes the cost of fuel we use to generate electricity to serve our retail customers, transportation costs for that fuel, and costs we incur to buy energy to supplement our own power plants.

We've included 2021 monthly rates on the back of this insert. These rates include a true-up credit of \$0.0061 per kilowatt-hour for the months January through June 2021 to refund customers an over-collection that occurred during the April through September 2020 time period. Each customer class receives a separate Energy Adjustment Factor Rate. We calculated these rates by multiplying the approved Energy Adjustment Rider Rate by the Class Energy Adjustment Factor Ratio. For more information, see page 2 of your Electric Rate Schedule at otpc.com.
