Upgrade and save with rebates and off-peak heating prices.

Water heater

Install an off-peak water heater for a generous rebate. Receive a **\$150 to \$300** rebate on a qualified electric water heater served on an off-peak rate. Qualified commercial systems can receive a rebate of **\$20 per kilowatt (kW)**.

Thermal storage system

100 percent efficient thermal storage systems work with our discounted off-peak rates. Available in underfloor, room, or central furnace designs. Receive a rebate of **\$40 per kW** for heating storage systems installed on a qualified off-peak rate. Maximums apply.

Plenum heater and boiler

Install a 9kW to 25kW electric plenum heater, boiler, or furnace on our Dual Fuel or Residential Demand Control (RDC) Rate and receive **\$500 per unit**. Get **\$20 per kW** on larger units.

Heat pump

Air-source heat pumps (ASHPs), cold-climate heat pumps (CCHPs), and geothermal heat pumps (GHPs) take advantage of free heat available in the air or ground.

North Dakota rebates

Install a qualified heat pump system on our Dual Fuel, Deferred Load, or RDC Rate to receive a rebate:

- **\$250 per ton** on ASHPs installed with supplemental electric heating.
- **\$500 to \$700 per ton** of heating capacity for CCHPs.
- **\$700 per ton** on GHPs.

South Dakota rebates

Install a qualified heat pump system that meets efficiency levels to receive a rebate. Qualified CCHPs can also qualify when served on our Dual Fuel, Deferred Load, or RDC Rate. Receive:

- **\$250 per ton** on ASHPs.
- **\$500 to \$900 per ton** for CCHPs.
- **\$900 per ton** for GHPs.
