

A photograph of a rural landscape. In the foreground, a dirt road curves through a green field. In the middle ground, a line of utility poles with power lines stretches across the scene. The background features a line of trees and a clear sky. A white text box is overlaid on the right side of the image.

Power you can count on.

We own more than 11,000 miles of power line. That's enough to reach from the East coast to the West coast and back, twice. With strong system planning and dedicated field crews, our customers have power **more than 99.98% of the time!**
