### Energy insights

Recent (3) expand  
Your refrigerator temperatures should be between 37°F and 40°F. Test it to find your fridge's temperature.

The more you use a light fixture, the more money and electricity you'll save by using LED bulbs over incandescent. [I will Get More](#)

Tune up your fridge to save energy and keep it running longer and stronger.

### Your last bill

Total credits used	285 kWh
Average daily cost	\$1.36
Number of days	34
Average temp	49°F
Bill amount	\$46.22
