New Minnesota rates begin with this electric service statement

(Effective July 1, 2022)

On February 1, 2022, the Minnesota Public Utilities Commission (MPUC) issued its order in our rate case, which we filed in November 2020. The MPUC approved a decrease of approximately \$2.2 million to overall annual revenues. This rate case was driven by:

- Generation projects to enhance resilience and accommodate transition of our generation fleet.
- Investments in smarter technologies.
- Cost changes that have occurred since our last general rate case in 2016.

We estimate a typical residential customer's bill will decrease by \$1.28 a month compared to rates prior to our request, and a typical business customer's bill will decrease by \$10.19 a month compared to rates prior to our request. Bill impacts will vary depending on your electric service rate and the amount of electricity you use.

Residential service rate changes

- The residential monthly service charge will increase from \$9.75 to \$10.75.

The impact to your monthly bill will vary depending on your electric service rate, the amount of electricity you use, and the facilities installed to serve you. Your monthly bill also will vary with changes in the costs associated with purchased energy and the fuel we use to serve you. Otter Tail Power Company passes along purchased energy and fuel costs without any markup.

Interim rate refund

State law allowed us to collect an interim (temporary) rate increase while the MPUC considered our rate case request. The interim increase began on January 1, 2021. Costs collected in the interim period differ from final rates. Final rates will be lower than interim rates, so we'll refund you the difference with interest on your first billing following August 6, 2022. A typical residential customer's refund will be approximately \$85.69.
