

Thermal storage

Warm, comfortable,
and efficient!

Enjoy the comfort and savings of storage heating!

A thermal-storage heating system stores heat, then releases it when needed to keep you warm and comfortable. These heating systems also qualify for our discounted off-peak rates.

Get a rebate of \$75 per kilowatt.

There are many options to choose from and all are 100 percent efficient, including:

- Central furnaces.
- Room units.
- Underfloor cable or panel systems.
- Electric boilers installed to serve underfloor hydronic systems.

To qualify for a rebate, install a minimum of 9 kilowatts on our Fixed Time of Delivery, Deferred Load, or Residential Demand Control (RDC) Rate.

Add a heat pump for efficiency and savings

Pair a thermal-storage system with a qualified heat pump on our Deferred Load or RDC Rate for summer-time cooling and even higher efficiency and receive a rebate!

Rebate varies by state.
