

Customer notice

The Minnesota Public Utilities Commission approved our request for a new Thermal Market Energy Pricing Tariff and associated updates to our Index, Matrices, and Rider Rate Schedules effective January 1, 2026.

This voluntary rider allows certain large general service customers who use thermal storage powered by renewable generation resources not owned by us to pay market rates for energy on an hourly basis. If they're registered as Midcontinent Independent System Operator (MISO) load-modifying resources and meet other rider requirements, they'll pay MISO charges directly and not through our Energy Adjustment Rider.
