Monthly Minimum Bill:	Customer + Facilities Charges	
Facilities Charge per Month:	\$0.00	
	Summer	Winter
Energy Charge per kWh:	8.194 €/kWh	6.111 €/kWh

SEASONAL RESIDENTIAL SERVICE:

- These rates and regulations shall apply to Seasonal Residential Service without voluntary rate riders.
- Seasonal Residential customers will be billed at the same rate as Residential Customers, except as follows:

A one-time seasonal fixed charge of \$43.00 will be billed for each Meter in addition to the rate provided above. The fixed charge will be included on the first bill rendered for each season.

Each Seasonal Residential Customer will be billed for the number of months each season that the residence is in use, but not less than a minimum of four months, plus the seasonal fixed charge. At the option of the Company, Meters may be read during the off-season and a bill will be rendered if Energy recorded on the Meter exceeds 200 Kilowatt-Hours. If the first bill of the season exceeds an average combined usage on all meters of 200 Kilowatt-Hours per month during the off-season months, the Customer, at the option of the Company, may no longer be eligible for Seasonal Residential Service.

Bills may be rendered on a two-month basis at the Company's discretion when the Energy used exceeds 200 Kilowatt-Hours and more than 55 days have elapsed since the previous Meter Reading.

ADVANCED METER OPT-OUT RATES, TERMS AND CONDITIONS:

ADVANCED METER OPT-OUT – M102	
Customer Charge per Month:	\$80.10

- Customers may select to have the remote communications capabilities of advanced meters turned off by opting out ("Advanced Meter Opt-Out"). Advanced Meter Opt-Out customers' meters will be manually read. Customers will pay additional charges to opt-out as noted elsewhere in this schedule.
- Only customers classified as Residential customers and who are exclusively on this Section 9.01 Residential Service rate are eligible for an opt-out agreement with Otter Tail. Residential customers who also have a rate other than this Section 9.01 Residential Service Rate on their bill would not be eligible for an opt-out agreement on either rate. Advanced meters will be required for commercial customers. Residential customers who elect to opt-out must not have their meter located inside their home or have any other physical barriers to reading the meter. Customers must continue to allow Otter Tail meter readers onto their premises to read the meter.
- Customers that want to opt-out of having a communicating advanced meter must not have a history of tampering with meters. Customers also cannot have two or more missed payments in the last 12 months of billing.
- Customers who opt-out of a communicating advanced meter will not be opted-out of the recovery of the costs of the advanced meter, whether those costs are recovered in the Electric Utility Infrastructure Cost Recovery rider (EUIR rider) or recovered in base rates or elsewhere. Customers who opt-out will have the same meter as those who do not opt-out.
- Customers who opt-out of a communicating advanced meter agree they are ineligible for participation in programs that require a communicating advanced meter. Not only does this exclude these customers from receiving interval usage data, but also excludes these customers from any time-of-use program and any potential future programs dependent on an advanced meter including Electric Vehicle Charging programs, Net Metering and Storage.
- A one-time opt-out fixed charge of \$226.82 will be provided to the customer in addition to the rate and monthly customer charges provided above.

with Penalty	M165P
CT Metering with ancillary load	M168C
CT Metering with ancillary load (with Short-Duration Cycling)	M169C

AVAILABILITY: This rider is available for Customers with approved permanently connected interruptible loads; such loads are primarily the electric heating portion of dual fuel heating systems and may include approved Energy storage loads. Electric heating systems may include heat pumps. Domestic electric water heating and/or other permanently connected approved loads other than the exceptions noted below will be interrupted during control periods. Unless exemptions apply, electric fans, pumps, and other ancillary equipment used in the distribution of conditioned air and/or water shall be wired for service through the Customer's firm service Tariff.

When service to the electric equipment on this rate is interrupted, the back-up system cannot be electric.

Service exemptions allowed for interruptible load systems:

- Without ancillary loads for Self-Contained and Current Transformer (CT) Metering:** The Company retains the authority to allow a portion of the load to remain on during control periods in situations where 1) it is infeasible to separately serve the equipment's control systems or other critical ancillary equipment associated with this load, or 2) if the separation would violate the manufacturer's Underwriters Laboratory (UL) approval or other industry recognized operating standards. Although a minimal amount of fan and pump load may be allowed under this provision, it is not intended to be applied to larger loads such as the fan load on low-temperature grain drying.
- With ancillary loads for Current Transformer (CT) Metering:** During the control period the amount of ancillary load shall not exceed 5% of the metered maximum Demand measured during any period within the most recent 12 months. (For example, although a minimal amount of fan and/or pump load may be allowed under this provision, it is not intended to be applied to larger loads such as the non-conditioned fan load on low-temperature grain drying.) If the Customer does not have a back-up heating system, it is not automatic,

or it is inadequate, then the Company requires a primary electric heating Customer served on an interruptible rate to complete a Controlled Service Agreement acknowledging that the Customer is aware of the potential for property damage.
