# Heat storage offers comfort and savings

A heat-storage system stores heat, then releases it when needed to keep you warm and comfortable. They're 100 percent efficient, eligible for our discounted off-peak rates, and may qualify for rebates.

Whether you're building a new space, adding an addition, or upgrading, there is a system for you.

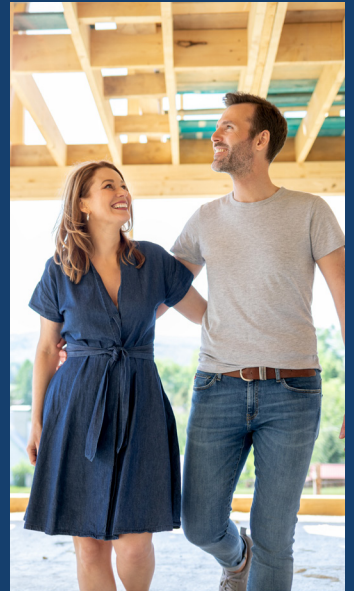

- Central furnaces
- Room units
- Underfloor cable or panel systems
- Electric boilers installed to serve underfloor hydronic systems

**Get a rebate of \$75 per kilowatt.  
That's more than \$2,000 for a typical home!**

Add a heat pump for higher efficiency and greater savings.

## Building?

Install underfloor heat storage before you pour your foundation slab. Stored heat radiates to keep people comfortable.
