Hand dryers

- Measure consists of installing efficient hand dryers that save energy by drying with air movement, using motion sensors and reducing drying time.
- Dryers are applicable in commercial, retail, and industrial settings.
- Dryers must use 5Wh or less per use.
- Dryers must operate with motion activation at rated load less than 1500 watts.
- Dryers must not incorporate any electric heating element.
- Rebate of \$250 per dryer
