

Notice of Supplemental Energy Adjustment

The Energy Adjustment line item on your monthly electric bill includes the forecasted cost of fuel (including transportation) and forecasted energy purchases to supplement our power generation less the forecasted fuel-related costs recovered through sales. These energy costs pass through to our customers without markup, so we don't profit from them.

After reviewing the Energy Adjustment Forecast, we've determined that a customer refund is necessary for the months of July 2025 to October 2025 due to substantially lower costs than forecasted.

We filed an automatic adjustment in Docket No. E017/AA-24-65 on July 28, 2025, to return the overcollection from July 1, 2025, to October 31, 2025. This results in a four-month refund of \$0.00290 per kilowatt-hour, which will appear as part of the monthly Energy Adjustment on customer bills from January 1, 2026, through April 30, 2026.
