

# Notice of Supplemental Energy Adjustment

The Energy Adjustment line item on your monthly electric bill includes the forecasted cost of fuel (including transportation) and forecasted energy purchases to supplement our power generation less the forecasted fuel-related costs recovered through sales. These energy costs pass through to our customers without markup, so we don't profit from them.

After reviewing the Energy Adjustment Forecast, we've determined that a customer refund is necessary for the months of September 2025 to December 2025 due to substantially lower costs than forecasted.

We filed an automatic adjustment in Docket No. E017/AA-24-65 on July 28, 2025, to return the overcollection from January 1, 2025, to June 30, 2025. This results in a four-month refund of \$0.00590 per kilowatt-hour, which will appear as part of the monthly Energy Adjustment on customer bills from September 1, 2025, through December 31, 2025.
