

Quality Installation Rebate Program – MN/SD

How to Participate- *complete application with supporting training documentation*

Training options

1. North American Technician Excellence (NATE) certification
2. Minnesota Air Source Heat Pump Collaborative certification
3. Manufacturer or Distributor sponsored training – with heat pump focus
4. Similar program that expands knowledge on the latest heat pump technology and installation or operation best practices

Examples of Manufacturer or Distributor sponsored training that have been accepted:

- *Mitsubishi Diamond Dealer Certification*
- *RHI Supply - Gree Training*
- *Auer Steel - Evolution Extreme Variable Speed Heat Pump Training*

Quality Installation Rebate Program – MN/SD

Key Items:

- If you are not sure if a training will qualify you. Send our way and we will look and evaluate.
- We want engaged contractors. Communicate what you are seeing in the field and any issues you might be seeing.
- Heat pump proposal option to every customer highlighting potential benefits including energy savings, rebates, tax credits
- Rebate applications completed fully and in a timely manner. If installation/application will not be completed before October.

Please let Energy Management Representatives know expected completion and equipment details.

THANK YOU!
