

South Dakota customer notice

The South Dakota Public Utilities Commission approved our request to increase our Phase-In Rider. Our Phase-In Rider includes two components. The first component is a percent of base rates designed to recover costs associated with generation projects and streamline approved adjustments to our customers. The second component is a new monthly per meter charge to recover Advanced Grid Infrastructure costs (which include Advanced Metering Infrastructure, an Outage Management System, and Demand Response investments). This rider helps ensure we can continue to provide you with safe, reliable service.

Our Phase-In Rider, including both rate components, will go into effect September 1, 2022. The percent of base rates will apply to all customers. The percentage applied to customer bills will increase from 1.351% to 10.181%.
