**Upgrade your
electrical panel
and save money!**

Rebates up to \$2,000 are available.

Upgrade your electrical panel and save money!

- **Lower energy bills:** A new electrical panel can reduce your monthly energy costs 10%-50%.
- **Future ready:** Upgrading to a higher amperage panel ensures that your electrical system can handle future needs, potentially saving you from expensive upgrades later.
- **Home marketability:** Updated electrical infrastructure can attract potential buyers, making your property a valuable asset in the real estate market.

Take advantage of available rebates

Residential only

Get up to \$250 for panel upgrades receiving Inflation Reduction Act (IRA) tax credits or state administered programs.

Residential and commercial

- Receive **up to \$1,000** for panel upgrades connecting approved technologies for direct load control programs, including our CoolSavings program and electric water heating bill credit.
- Receive **up to \$2,000** for panel upgrades installing off-peak service and connecting approved technologies for load control programs, including Dual Fuel, thermal storage, electric water heating, and electric vehicle charging.
