# LEARN ABOUT INTERNET SAFETY!

June is National  
Internet Safety Month

The internet is an amazing tool that can help us learn, create, and communicate. With a whole universe of information at your fingertips, it's important to be safe online.

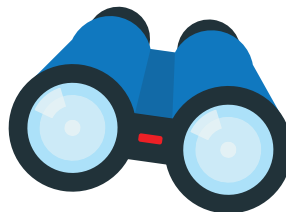

## BE SECURE

Use different and hard-to-guess passwords and store your information in a secure location.

## BE ALERT

Not everything on the internet is true. Be cautious and if something online seems too good to be true, ask someone you trust.

## BE KIND

It's alright to have different opinions than others. Just remember to treat people with kindness and how you'd like to be treated.

## BE RESPONSIBLE

Information you post and share online isn't private. Be responsible and careful with what you share.

## ASK QUESTIONS

If you see something online that you aren't sure about, ask a trusted adult.

# CRACK THE CODE

Change each letter identified below the questions to the letter found to the **LEFT** of it on the keyboard. For example, if the letter under the question was O, you'll fill in an I.

1. Why is a spider such a good computer programmer?

O Y    L M P E D    S : :    S N P I Y  
 Y J R    E R N

2. What's an alien's favorite key on a keyboard?

Y J R    D { S V R    N S T

3. How did the computer get out of the house?

O Y    I D R F    E O M F P E D

ANSWER KEY: 1. It knows all about the web. 2. The space bar. 3. It used windows.

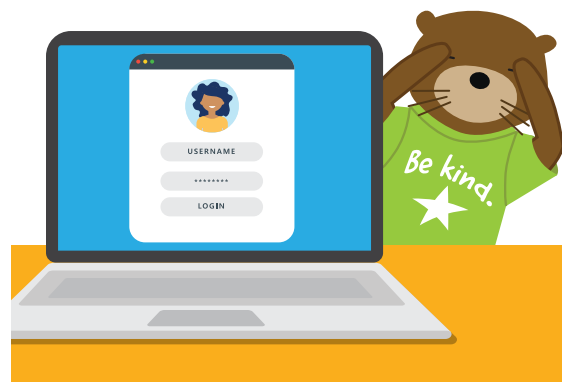

# CHOOSE A STRONG PASSWORD

A strong password is the key to keeping your information safe and secure.

A strong password:

- ★ Should be at least 12 characters long (14 or more is even better).
- ★ Combines uppercase and lowercase letters, numbers, and symbols.
- ★ Doesn't use personal information.
- ★ Must be different from any of your previous passwords.
- ★ Is easy for you to remember, but difficult for others to guess.

**Remember not to share your password with others!**

## CUSTOMERS' COOKERY

### Amelia's Cooked Playdough
